

In *Four Card Poker* progressive, you receive five cards to make your best four-card poker hand, and the dealer receives six cards to make his best four-card poker hand.

### **Player vs Dealer**

Bet on the required ante spot to play against the dealer's hand. The best four-card hand wins, and the player wins ties. If you bet on the ante wager and want to stay in the game after viewing your cards, you must make a play wager. The play wager has to be at least equal to the ante but may be up to three times the ante. It's your four-card poker hand against the dealer's four-card poker hand, and the best hand wins! The ante and play bets pay even money.

### **Automatic Bonuses**

The top three hands in the game (four-of-a-kind, straight flush and three-of-a-kind) receive an automatic bonus payout on the ante bet. See table for odds. Automatic bonuses are paid even if the dealer has a better four-card hand.

### **Aces Up<sup>®</sup>**

Bet on the *Aces Up* spot and win when you're dealt a pair of aces or better. The *Aces Up* bonus is always paid even if the dealer has a better hand.

### **Bad Beat Bonus**

You have two ways to win if you are involved in a bad beat with the dealer. The first is by losing with a two pair or better and the second is by beating the dealer's hand of a two pair or better.

### **Progressive Payouts**

Progressive winners are determined from all five cards dealt to the player. The optional \$1 progressive bet qualifies you for part or all of the incrementing jackpot. See payable for odds. Folded hands do not qualify for payouts on the progressive wager.

The top two hands trigger envy bonuses. You win if any other player gets a royal flush or straight flush. See payable for odds. You can win multiple envy bonuses in a round, but you cannot win envy bonuses for your own hand or the dealer's hand.
